

Health Alert Allergy Forms

The Ellington Public Schools makes every effort to raise the awareness of faculty, staff and students about severe food allergies and other potentially life threatening allergies. Should you have any specific concerns about your child's severe food allergy or other potentially life threatening allergy, please contact your child's school health office.

If you wish for the school to distribute your child's health alert form to members of the school faculty and staff, you must sign and date this form below and returned it to your child's school nurse. Once returned, a printed copy of your child's health alert form will be distributed within the school. The school district encourages you to contact the school bus company and provide them with a copy of the health alert form if you deem this necessary.

Please be aware that it will be the responsibility of the parent to inform their child's school nurse of any new allergies or if you wish to withdraw your approval to have the health alert distributed within your child's school.

Should you have questions, please call your child's school to discuss any food allergy or other potentially life threatening allergy needs of your child.
